# "Natural Fertility" Workshop

*"enhance your fertility ~ learn natural contraception techniques  
and balance your monthly cycle"*

29th April  
or 26th August

**Making Babies Naturally**

## Natural Fertility with Herbal Medicine

This one day workshop is based on Francesca Naisch's teachings of Natural Fertility & Contraception.

As a qualified naturopath, lecturer and guest speaker with over a decade of experience, Narelle S. Duncan, a 'Natural Fertility Counsellor' will be conducting the Workshop.

If you are trying to 'get pregnant', looking for a natural

alternative to contraception or wishing to expand your natural medicine knowledge to include 'Natural Fertility'... then this is the workshop for you!

Narelle will overview the physiology of the reproductive system, teach you how to read temperature charts in order to evaluate women's hormone levels; detect bodily changes which reflect fertile times and co-ordinate and balance the monthly cycle to promote fertility or natural contraception.

The use of herbal medicine and natural remedies will also be presented for use in the treatment of common reproductive conditions.

## Overcoming Fertility Problems

Most women, at some stage in their life, face imbalances in their hormone cycles.... the symptoms of pre-menstrual tension and the possibility of infertility.

'Natural Fertility' aims to support you with a holistic approach to optimising fertility with a natural non-invasive method which empowers you to be aware of your own bodily cycles.

## Conscious Conception

'Natural Fertility' helps teach you to understand your natural fertility cycles through observing bodily signs, temperature readings and your personal lunar cycle.

Combining these methods along with a pre-conception nutrition program supports optimal health for conception!

## Natural Contraception

'Natural Fertility' is one of the most empowering methods of avoiding conception using natural methods available. These methods help you to understand and co-operate with your cycles - identifying your fertile and infertile times.

This program can be used by all women, whether or not their cycles are regular and at any stage during their fertile life.

This method was developed in 1975 and has aided over 4000 women and couples in Natural Fertility.
